

DENIS PROKHODA

Data and Mechanical Analyst

I've been passionate about numbers since I was a kid. After finishing my career in U.S. Army as vehicle mechanic I was drawn to business management. The next step was the Data Analytics Bootcamp where I finally combined together my deep knowledge in business management with great interest in numbers. I'm excited about using data to help companies make better business decisions.

PROFESSIONAL EXPERIENCE

DATA ANALYTICS APPRENTICE

Nashville Software School

01/2021 - 04/2021

Nashville, Tennessee

Full-time intensive program where I developed analytical and business intelligence experience through individual and team projects.

PROJECTS AND ACHIEVEMENTS

- **Created various visualizations of the datasets in Excel and done project for the Nashville City Cemetery Association.**
- Cleaned the raw data and found essential information in the dataset by using Pivot table and various Excel functions.
- Created marketing materials for promoting interest among tourists and locals in historical part of the cemetery by using Power Point presentation.
- **Developed database objects, including tables, views and materialized views using SQL (PostgreSQL) in App Trader Project.**
- Using given data found all necessary information about the most profitable Apps and their potential profitability by using SQL's and Excel tools.
- Developed and visualized in Power Bi "The Top 10 List" of the apps that App Trader (client) should buy.
